ADC KRONE Introduces New TrueNet Portfolio of Structured Cabling Solutions for the Enterprise at IT&T 2007

TrueNet Offers Only Copper and Fibre Enterprise Solution with Zero Bit Error Warranty

VIENNA – 30 January 2007 – ADC KRONE (NASDAQ: ADCT; www.adc.com), a market leader in communications network infrastructure solutions, is exhibiting its new **TrueNet[®] shielded portfolio of structured cabling products** at IT&T 2007 (Hall A, Stand A0106) in Vienna, 30 January to 1 February. TrueNet is designed for the enterprise and data centre markets, and developed to satisfy all network infrastructure connectivity requirements in one robust solution.

The TrueNet product family includes copper and fibre connectivity, cable management products, and emerging technologies like Power over Ethernet (PoE) and Physical Layer Management (PLM). TrueNet includes a full line of augmented Category 6, and Category 6/5e products for applications from the data centre to the desktop. It is a comprehensive portfolio of products backed up by an all-inclusive warranty that enables users to maximise their network data integrity and system throughput by providing a Zero Bit Error Warranty.

In today's IT and communication environment, structured cabling is the foundation on which the whole enterprise depends. Network slow-down and outage costs can range from thousands to millions of dollars per hour. Network managers, therefore, have to install the most future-proof, reliable and cost-effective cabling infrastructure to insure their organisation's effectiveness and profitability.

"By specifying a TrueNet warranted solution from ADC KRONE, enterprises are guaranteed to receive a high-performance structured cabling system comprising copper and fibre connectivity installed by high quality, approved installers," said Axel Kahsnitz, vice president

ADC KRONE Introduces New TrueNet Portfolio at ITnT – Page 2

for ADC and regional director for ADC KRONE EMEA. “No other structured cabling system on the market offers a zero bit error warranty across both copper and fibre.”

Leading Edge Copper Solutions

At the IT&T show, ADC KRONE will be showing CopperTen™, its 10Gigabit Ethernet structured cabling solution that is available in shielded and unshielded versions. The unshielded version was the first copper UTP solution to carry 10Gb transmission over a full 100 metres. Furthermore, ADC KRONE’s Category 5e and Category 6 components are backed by a Premium Verification, which ensures quality standards are upheld at all times on manufactured products.

Improved Fibre Backbone and Campus Solutions

ADC KRONE’s extensive portfolio of single-mode, OM1, OM2 and OM3 multi-mode fibre cable, SC, LC and MTRJ connectivity offers endless solutions for end-to-end network infrastructure design to maximise network throughput.

TrueNet structured cabling solutions can be purchased through ADC KRONE’s network of Value Added Resellers, System Integrators and Distribution Partners. For a complete list of contacts, please visit www.adckrone.com.

About ADC KRONE

ADC serves its customers as ADC KRONE in the Europe/Middle East/Africa, Asia, and Indo-Pacific regions of the world. ADC KRONE provides the network infrastructure equipment and professional services needed to deliver voice, video, Internet and data communications around the world. Wireline, wireless, cable, enterprise, and broadcast network operators rely on ADC offerings to deliver bandwidth intensive, high-speed services to residential, business and mobile subscribers. ADC (NASDAQ: ADCT) has sales into more than 140 countries. Learn more about ADC KRONE at www.adckrone.com.
