ADC KRONE Features Expanded Portfolio of FTTX Solutions At 2010 FTTH Council Europe Conference

- *Solutions Support Applications for Entire FTTX Network – Central Office to OSP to Customer Premises*
- *Enable Service Providers to Accelerate Next-generation Network Deployments*
- *ADC KRONE Expert Presents Deployment Best Practices*

BERLIN – 15 February, 2010 – ADC KRONE (NASDAQ: ADCT; www.adc.com) today announced that it will highlight its fiber leadership through an expanded portfolio of [Fiber-to-the-X \(FTTX\) solutions](#) at the 2010 FTTH Council Europe Conference, from 24-25 February at The FIL (Feira Internacional de Lisboa) in Lisbon, Stand 4.

"With customers' growing demand for more bandwidth, service providers are looking for ways to install fiber networks into single residential units and multiple dwelling units (MDUs) faster and more economically," said Carsten Storbeck, director of Carrier Product Management for ADC KRONE in EMEA and Conference presenter. "ADC KRONE's comprehensive portfolio of solutions, which features a connectorized approach, saves time and money, and accelerates the deployment of next-generation networks designed to meet the ever-increasing demand for advanced services."

ADC KRONE's industry-leading solutions displayed at the Conference include:

- **RealFlex™ 3 Drop Cables** – Designed for MDUs, this product greatly reduces the risk to bend-induced insertion loss created during installation.
- **OmniReach® Multiport Service Terminal (MST)** – This product features hardened connector technology that is designed to withstand extremes in temperatures and conditions, and offers robust environmental performance.
- **Transition Box with DLX™ Adapters** – This combination offers the ultimate plug-and-play solution for durable and reliable service connections in the outside plant/final drop segment of the network.
- **Fiber Optic Customer Outlet** – This product enables easy and unobtrusive terminations of fiber optic cables within an office, home or communication room.

ADC KRONE at 2010 FTTH Council Europe Conference – Page 2

- **FAME® Splitter/Cassette Solution** - This unique and universally applicable system can be used in central office termination/splice frames, as well as in outside plant splice cabinets or closures, and provides a secure housing for optical splitter components.

ADC KRONE's Expert Presents Deployment Best Practices

As part of the conference program, Storbeck will discuss "Deployment Best Practices" during a breakout session on 24 February, from 4:30- 5:45 pm. He will talk about how the effective utilization of connectorization technology throughout the access network achieves accessibility, flexibility and regulatory compliance, while realising the full potential of the optical budget. With improvements in optical active components set to bring additional optical budget, network operators adopting connectorization strategies can guarantee network scalability – either in terms of bandwidth, distance or diffusion – at minimum OPEX, while delivering maximum subscriber satisfaction.

About ADC KRONE's OmniReach FTTX Solutions

ADC KRONE's [OmniReach Solutions](#) are the industry's first platforms designed from the ground up to meet the unique requirements of FTTX networks. Designed for operational efficiency and scalability, OmniReach solutions simplify FTTX network installation, maintenance and management from the central office/headend to the outside plant to the premises.

About ADC KRONE

ADC serves its customers as ADC KRONE in the Europe/Middle East/Africa, Asia-Pacific regions of the world. ADC KRONE provides the network infrastructure equipment and services needed to deliver voice, video, Internet and data communications around the world. Wireline, wireless, cable, enterprise, and broadcast network operators rely on ADC offerings to deliver bandwidth intensive, high-speed services to residential, business and mobile subscribers. ADC (NASDAQ: ADCT) has sales into more than 130 countries. Learn more about ADC KRONE at www.adckrone.com.
