ADC KRONE Debuts New Additions to OmniReach FTTX Solutions Portfolio at 2008 FTTH Council Europe in Paris

Company's Solutions are Accelerating the Migration to Fibre in Diverse Network Environments

Berlin – 11 February, 2008 – ADC KRONE (NASDAQ: ADCT; www.adc.com) today announced that it will introduce several new additions to its complete line of high-performance OmniReach® FTTX solutions at the 2008 FTTH Council Europe, Feb. 27-28 at the Palais de Congrès Paris, booth B2.

Among the new ADC KRONE products being debuted at the FTTH Council 2008 is the OmniReach Indoor Fibre Distribution Hub (IFDH), designed to meet and serve the distinct needs of diverse markets and customer segments. The IFDH enclosures organize and administer fibre optic cables and passive optical splitters in an inside plant environment typically found within a multiple dwelling unit (MDU). These enclosures are used to connect feeder and distribution cables via optical splitters, providing a vital cross-connect/interconnect interface for optical transmission signals at the MDU.

Two other ADC KRONE solutions also will be introduced at the Council, including the MDU Rapid Fiber System, designed to eliminate the unique challenges posed by service delivery to MDU buildings, and the FAME™ (Fibre Access Management Element), a single circuit/single element splice management technology that is common to product solutions deployed in every segment of the network.

"Today's market environment requires continuous infrastructure improvements to meet the need to deliver greater bandwidth in any type of building," said Carsten Storbeck, director of Carrier Product Management for ADC KRONE in EMEA. "ADC KRONE's comprehensive portfolio of application-specific FTTX solutions enables service providers to accelerate the deployment of next generation networks designed to satisfy subscriber demand for increased bandwidth and enhanced services."

About ADC KRONE's OmniReach FTTX Solutions

ADC KRONE's OmniReach Solutions are the industry's first platforms designed from the ground up to meet the unique requirements of FTTX networks. Designed for operational efficiency and scalability, OmniReach solutions simplify FTTX network installation, maintenance and management from the central office/headend to the outside plant to the premises.

About ADC KRONE

ADC serves its customers as ADC KRONE in the Europe/Middle East/Africa, Asia-Pacific regions of the world. ADC KRONE provides the network infrastructure equipment and services needed to deliver voice, video, Internet and data communications around the world. Wireline, wireless, cable, enterprise, and broadcast network operators rely on ADC offerings to deliver bandwidth intensive, high-speed services to residential, business and mobile subscribers. ADC (NASDAQ: ADCT) has sales into more than 130 countries. Learn more about ADC KRONE at www.adckrone.com.
